Pressure Switches

## Product Description

The A/AFS Series differential pressure switches are general purpose proving switches designed for both HVAC and Energy Management applications. These pressure switches can be used to sense positive, negative, or differential air pressures.

The A/AFS-222 has a field adjustable operating range of 0.07 " to $12.0^{\prime \prime}$ wc The A/AFS-222 has a field adjustable setpoint range of $0.05^{\prime \prime}+/-0.02^{\prime \prime}$ to $12^{\prime \prime}$ wc with a field adjustable release range of 0.04 " to $11.2^{\prime \prime}$ of w.c..

The A/AFS-262 has a field adjustable operating range of 0.07 " to $2.0^{\prime \prime}$ wc. It also has a setpoint range of $0.05^{\prime \prime}+/-0.02^{\prime \prime}$ to $2^{\prime \prime}$ we with a field adjustable "release range" of 0.04 " to 1.9 " w.c. The sampling connections are located on each side of the diaghram.

Both the A/AFS-222 and A/AFS-262 will accept a 0.25 " O.D. rigid metallic tubing via the integral compression ferrule and nut. The enclosure cover guards against accidental contact with the live switch terminal screws and the setpoint adjusting screw. Both units also contain a $1 / 2^{\prime \prime}$ conduit knockout in the cover of the enclosure as well as a diaphragm, calibration spring, and a snap acting SPDT switch.
