The Problem:
Waiting for Hot Water
It’s a common problem: turn on the faucet or shower for hot water, then wait for it to arrive. In fact, the wait can be minutes in larger homes with multiple bathrooms and long runs of pipe between the plumbing fixtures and the water heater! With a Taco Domestic Hot Water Recirculation System in place, there’s no more wait. Instant hot water!

Waiting Means Wasting
Waiting for hot water sends millions of gallons of cooled water down the drain each year. In fact, an average family of four wastes up to 12,000 gallons of water each year waiting for hot water.* Water conservation is so important that many US states and municipalities routinely impose watering bans and offer rebate incentives to help conserve this natural resource.

Energy Down The Drain
Of course, all that “waiting water” contains some heat energy (BTU’s), even if it’s only room temperature. Wasting those BTU’s and starting over with fresh, cold water to heat up requires even more heat energy. So in addition to wasting water, millions of BTU’s and energy dollars are wasted, too.

The Solution:
Install a Taco Domestic Hot Water Recirculation (DHWR) Product
Provide your customers with the comfort and convenience of instant hot water without the waste. Taco DHWR products are designed to meet a variety of DHWR system types, and offer customers a wide range of options to control hot water delivery to faucets and showers.

System Types & Products

Typical Installation & Piping
Three settings. One reputation.
The 00e® series — 006e3 is an infinitely variable, high-efficiency wet rotor circulator with an ECM permanent magnet motor. With 3 easy settings, the 006e3 delivers performance, reliability and ease of installation that made the 00® famous.

- 13’ Shut-off head, 11 gpm max flow
- Easy to use dial:
  - Low, Medium, High
  - 003 & 006 performance point references
- Rugged high-performance composite casing
- 3 color LED indicator light:
  - Blue: Operating mode
  - White: SureStart®
  - Red: Error diagnostic
- Whisper quiet operation
- 1” union connection with optional ½” & ¾” fitting sets sold separately (See chart below)
- Double insulated, no ground wire required

### Materials of Construction
- Casing: Composite
- Stator Housing: Composite
- Cartridge: Composite
- Impeller: Composite
- Shaft: Composite
- Bearings: Carbon
- Thrust Bearing: Ceramic
- O-Ring & Gaskets: EPDM

### Choose the right fitting for the job!

A bundle of efficiency for instant **hot water** when you need it.

**SmartPlus-e™**  
ECM High-Efficiency **Hot Water** Recirculation System  

Perfect for systems with a tank water heater and dedicated hot water return line, the SmartPlus-e combines the high-efficiency of the 006e3 ECM circulator and the intelligence of the award-winning SmartPlug Instant Hot Water Control®. A one-two punch that delivers instant hot water comfort while saving energy and water – up to 12,000 gallons a year! With **SureStart®** automatic unblocking and air purging, you can expect years of trouble-free performance from Taco, the leader in reliability. **—Install it, forget it™.**

- **Quick & easy installation:**  
  - 3 easy settings  
  - Multiple connection options available  
  - No aquastat, no timer, no programming

- **High-efficiency ECM motor uses up to 85% less electricity**

- **Saves time & energy:**  
  - Learns hot water usage patterns  
  - Maximizes hot water comfort & energy savings

- **SmartPlug Instant Hot Water Control®**  
  - Smart Mode  
  - Pulse Mode  
  - Vacation Mode  
  - Exercise Function

- **Unmatched customer service & technical support**

Ideal for systems with a **tank water heater** & dedicated **hot water return line**

**SmartPlus-e Bundle Includes:**

- 6ft. power cord
- Temperature sensor

See Taco Catalog #100-152 and Submittal Datasheet 101-202 for full details.
A bundle of efficiency for instant **hot water** when you need it.

**HotLinkPlus-e™**

ECM High-Efficiency **Hot Water** Recirculation System

Enjoy instant hot water comfort while avoiding a major renovation. The Hot-LinkPlus-e system installs easily into existing plumbing with a tank water heater. No dedicated hot water return line is needed! The system combines the ECM high-efficiency 006e3 hot water circulator with the award-winning SmartPlug Instant Hot Water Control® and Hot-Link® Valve for maximum comfort and efficiency. Enjoy water savings of up to 12,000 gallons per year. You can expect trouble-free performance reinforced by **SureStart®** automatic unblocking and air purging. Ideal for retrofits, the Hot-LinkPlus-e requires no programming and is built with the reliability that’s made Taco famous.

— **Install it, forget it™**.

- Fully automatic
  - Never needs programming
- Ideal for retrofits
  - No dedicated return line needed
  - Uses existing plumbing
- Saves time & energy
  - Learns hot water usage patterns
  - Conserves by providing instant hot water
- SmartPlug Instant Hot Water Control®
  - **Smart Mode**
  - **Pulse Mode**
  - **Vacation Mode**
  - **Exercise Function**
- High-efficiency ECM motor uses up to 85% less electricity
- Unmatched customer service & technical support

The patented SmartPlug® lets you upgrade any existing hot water recirculation pump with a power cord to "Smart" operation. Simply connect the SmartPlug to any 110V power outlet then plug the circulator power cord into the SmartPlug. A sensor in the SmartPlug will record the daily hot water usage pattern in a home and adjust the circulator run time automatically. Hot water will always be available when needed.

U.S. Pat# 8,594,853 and 9,207,682

Plumb n' Plug® Circulators

Go to www.TacoComfort.com for a list of all available models

Features with Analog Timer
- Factory Installed 6' Line Cord and 24 Hour/15 Minute Interval Analog Timer
- UL Listed
- Optional 95°F –115°F Aquastat Available
- Standard High Capacity Output
- Compact Design
- Quiet, Efficient Operation
- Direct Drive-Low Power Consumption
- Unique Replaceable Cartridge Design — Field Serviceable
- Self Lubricating
- No Mechanical Seal

Features with Digital Timer
- Unmatched Reliability — Maintenance Free
- Sweat Connections — Bronze
- Union & Threaded Connections — Stainless Steel
- Flanged — Stainless Steel
- Digital Timer, 7 day Programmable
- Large LCD Display
- Easy-to-Use Program Buttons
- On/Off Intervals as Short as 1 Minute
- 2,500 hour Capacitor Backup, Saves Settings

Materials of Construction
Circulator:
- Casing (Volute)..............Bronze or Stainless Steel
- Stator Housing.............Steel
- Cartridge....................Stainless Steel
- Impeller.....................Noryl®
- Shaft.........................Ceramic
- Bearings....................Carbon
- O-Ring......................EPDM

Integral Flow Check (IFC®):
- Body & Plunger............Acetal
- Spring......................Stainless Steel
- O-Ring......................EPDM

Specifications
- Input: 120VAC, 50/60HZ, single phase, 6A
- Output: 120VAC, 50/60HZ, Single phase, 1/2 hp (limited to 6 FLA, 36LRA)
- Sensor: NTC Thermistor, 10K ohm @ 77°F, B= 3392
- Fuse: 125V, 6A, Medium Acting
- 5x20 mm glass, Littelfuse® p/n 0233006 mxp
- Ambient Operating Temp: 50-104°F, 10-40°C

See Taco Catalog #100-6.6 and Submittal Datasheet 101-066 for full details.
For New or Retrofit Installations
Using the existing cold water line as the return line, TacoGenie® is ideal for both new and retrofit installations. Typically installed at the furthest fixture from the water heater, TacoGenie fits out of the way, under any bathroom vanity. Connections are made from the hot and cold lines to the suction and discharge side of the pump using adapter tees and stainless flex lines provided. When hot water is needed, the pump is activated by pressing a starter button, runs only long enough to supply hot water to the fixture and then automatically stops. This prevents hot water from entering the cold line. A spring-loaded Integral Flow-Check valve (IFC®) prevents cold water from entering the hot line. Optional wireless push button or motion sensor starters are also available.

Features and Benefits of the TacoGenie®
• Instant Hot Water Comfort
• Maximum Water & Energy Savings
• 24 Hour operation
• Maintenance free circulator - unmatched reliability
• Removable stainless steel cartridge — contains all moving parts
• Integral Flow-Check (IFC®) to prevent thermal-siphoning or gravity flow
• Pre-wired power cord and integral temperature sensor
• Adapter tees & stainless steel flex lines included (USK models only)
• Wireless Push Button remote or motion sensor starter-optional
• Ideal for tankless water heaters
• 3 Year Warranty
Instant hot water. No additional plumbing or electrical needed!

Hot-Link® is a quick, easy retrofit using the existing plumbing. Mount the valve under the sink furthest from the water heater and the pump at the water heater. The valve’s unique thermal disc technology sends cooled water back to the water heater so hot water lines remain hot.

Cleaning made easy.

There’s no need to remove the Hot-Link valve from the piping to keep it clean. Our exclusive clean-in-place design makes short work of keeping the system operating properly.

Features:
- Exclusive clean in place undersink valve design
  - Extends valve life
  - Reduces customer calls to replace “plugged” valves
- Creates a domestic hot water recirculation system without dedicated return loop piping
- Easy to retrofit to existing plumbing system
- Conserves water by greatly reducing the time it takes to get hot water
- Analog pump timer allows you to set the system to work during peak hours or to work continuously
- 3 Year Warranty

The HotLink System Includes:
- Hot-Link Valve
- Hot-Link Circulator
- (2) Braided Flex Hoses
- (2) 3/4” NPT Brass Half Unions (Male x Female)

Materials of Construction

Circulator:
- Casing (Volute): Stainless Steel
- Stator Housing: Steel
- Cartridge: Stainless Steel
- Impeller: Noryl®
- Shaft: Ceramic
- Bearings: Carbon
- O-Ring: EPDM

Hot-Link Valve:
- Body: Nylon
- Thermal Disc Actuator: Bi-Metal
- O-Ring Seals: EPDM
- Integral Flow Check (IFC®):
  - Body, Plunger: Acetal
  - O-Rings: EPDM
- Screen: 304 SS
- Stem: Nylon
- Actuator Cartridge: Stainless Steel
- Braided Flex Hoses: Stainless Steel

See Taco Catalog #100-93 and Submittal Datasheet 101-148 for full details.
**Potable Water Zone Sentry® Zone Valve (<.25% Lead)**

The Taco Potable Water Zone Sentry valve is available in a 2-way sweat configuration with either a normally open or normally closed actuator. Some typical installations would include a combination domestic water and hydronic heating system, culinary installation or water shut off to a potable system.

The Taco FloodBreaker® is a whole house adjustable leak protection system that monitors several aspects of water usage. It shuts off the water supply once any of the monitored settings are reached.

The FloodBreaker is NSF 61 certified and is suitable for potable water installations.

See Taco Catalog #100-109 and Submittal Datasheet 101-161 for full details.

**Features:**
- Programmable Leak Detection Settings
- Programmable Vacation Mode Leak Settings
- Audible Alarm
- Floor Sensor
- Output Contact, Input Contact
- Operates on Batteries and 9V DC Power Supply
- Reduces Property Damage
- Push Button Reset
- Mounts in Horizontal or Vertical Pipe

**Materials of Construction**
- Body: Brass ≤ .25% lead
- Internal Components: Acetal, Nylon, EPDM

---

The Taco LeakBreaker® is a water heater leak protection device that protects against flood damage from the containment failure of a water heater. It consists of a control unit, valve with actuator and sensor. This resettable, testable protection device can be installed on any style water heater to shut-off the incoming water supply, preventing additional water flow to a damaged water heater. The multi-color LED light and audible alarm lets you know the status of LeakBreaker at all times.

**Features**
- Re-Settable
- Testable
- Quick Connect Wiring
- Operates on Batteries or Power Supply
- Multi-Color LED Status Light
- Audible Alarm
- Alarm Mute
- 2 N/O; N/C Dry Contacts
- Full Port Valve
- Easy Removable Actuator

**Materials of Construction**
- Control Panel: High Performance Engineered Polymer
- Actuator
  - Body: High Performance Engineered Polymer
  - Gears: Internally Lubricated Engineered Polymer
- Valve
  - Body: Forged Brass
  - Stem: Brass
  - Press Ring: Brass
  - Ball: Brass (Chrome Plated)
