ALM2

Controller

**Web-based building
management made easy**

ALM2 CONTROLLER

| Feature | Benefit |
|--|---|
| Universal alarm and monitoring module | <p>Can be used to generate alarms and monitor temperatures or equipment operation in heating, ventilating and air conditioning equipment.</p> <p>Provides building safety and system operation data ensure that HVAC equipment is operating properly.</p> |
| 8 inputs that can be configured to support a temperature reading or a dry contact reading | <p>Universal application with field configurable inputs allows a wide range of monitoring and alarm generation.</p> <p>Can be used for temperature and pressure monitoring, pump operation, equipment status or other functions.</p> |
| All alarms events are reported to the network | <p>When used with the iWorx web capability, all alarms on monitored points are annunciated on both the local network and any web enabled device to provide 24/7 monitoring of functions.</p> |
| Alarm detection can also be reported locally | <p>In addition to network reporting, digital outputs can be used to drive external alarm indicators such as lamps, buzzers or phone dialers.</p> <p>Ensures that vital assets are protected when equipment failures are detected or operating parameters are exceeded.</p> |
| Points can be trended to monitor system parameters | <p>When combined with the iWorx trend function in the LCI-2 network manager, points can be trended to view system temperatures and record system performance.</p> <p>Allows pro-active system monitoring to prevent building freeze-ups or equipment malfunctions.</p> <p>Significantly reduces equipment failures and costly replacements by providing operational data.</p> |
